Thanks Steve. I think what you have indicated should do it. I'll check the website and look for the final report. Thanks for the quick response.

Hi Dwayne. I will add you to website so you can view info. EPA handed off oversight of the incident to TDEC a couple of weeks ago. Colonial maintains contractor resources at site as the fuel continues to slowly seep into the creek. They continue to maintain boom and collect fuel. I issued a NOFI to both Colonial as owner/operator and TN Department of transportation as 3rd party who caused discharge (drilled right through pipe) I'm hoping to have a final summary report soon and planned to post it on site as well as fill out and submit the 20 questions. I will include the Colonial and TDOT contacts in the paperwork. If there is specific info you need sooner, please let me know. 731 394-8996

Morning Steve,

Any update on this site? I checked the EPA OSC website, but I don't seem to have access to this site. I received the initial polrep from Chris Masterson, but it was early and somewhat limited in information. Also please provide info on Colonial pipeline as a potential Responsible party. While they apparently didn't cause the spill they may still be an RP since they owned the oil. Thanks

Dwayne

Good Morning,

I will be your NPFC Case Officer on this case and can be reached at (202)795-6079, FAX (202)372-8397, or email William.D.Adkins2@uscg.mil. I am available to assist you as needed and can answer any questions concerning NPFC funding, claims, PRFAs, State Access, RP liability, cost documentation, etc.

You can reach our Command Duty Officer 24/7 by calling directly at (202)494-9118 or through the National Response Center. Please ensure that NPFC is info'd on all of your message traffic regarding this case.

Please document the fact the product is a FWPCA oil and a PRP search has been initiated in your POLREP. You should clearly document the discharge or substantial threat of discharge to a U.S. navigable water, the adjoining shorelines or the waters of the U.S. EEZ. (state the waterway and the route the oil takes to/from the nexus to that waterway). If responding to a substantial threat of discharge you should document the circumstances that constitute the threat of discharge including, for onshore facility sources, the pathway to protected waters and shorelines.

As a reminder, a PRFA is not processed in the same manner as a CLAIM. If you do submit a PRFA the DUNS No. and Tax ID of the agency is required in order to obligate the PRFA in the CG financial system. Please note the actual reimbursement to the agency is subject to the terms and conditions specified in the PRFA, especially Paragraph #5 and the Scope of Work -Response Task List and detailed records of expenditures and activities for which reimbursement is sought will be required.

Please clearly identify the owner and/or operator of the vessel/facility with billing address, point of contact, telephone number, lat/long for and the physical address of the incident site.

If there is any indication that damage claims will be submitted, please notify me as soon as possible so that I can prepare a Notice of Designation letter informing the responsible party of its requirement to advertise for claims.

Should you later find that your FOSC actions were to "assess" the situation only, please annotate this fact in BOLD on your POLREPS
